### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

in the first paragraph of the specification, the phrase "now U.S. Patent No. \_\_\_\_\_" on the second line has been replaced with the phrase --now allowed--.

2. The following is an examiner's statement of reasons for allowance.

The invention as claimed is directed to a solid-state electronic junction devoid of electrolytic solution comprising a first conductive component and a second conductive component. The first component comprises a substrate and a layer of molecular units that are attached through their first ends to the substrate by covalent bonding or a strong electronic coupling (strong electronic coupling being defined in parent application 09/755,437 which was incorporated by reference into the instant application). The second conductive component comprises a layer of at least one metal and one metal oxide in electrical communication with the second ends of the molecular units. The layer of at least one metal and one metal oxide has a conductance that reversibly changes in response to a redox reaction occurring between the layer of metal/metal oxide and molecular units when a voltage is applied across the electronic junction.

Art Unit: 1773

Zhou et al. and Gryko et al. represent the closest prior art. However, neither Zhou et al. nor Gryko et al. teach or fairly suggest an electronic junction as claimed comprising a layer of at least one metal and one metal oxide in electrical communication with molecular units such that the conductance the metal/metal oxide changes reversibly in response to a redox reaction occurring between the layer of metal/metal oxide and molecular units when a voltage is applied across the electronic junction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
